# Funding

## Diversified funding position

### Diversified funding sources and distribution channels

### Actual positioning Q1 2019

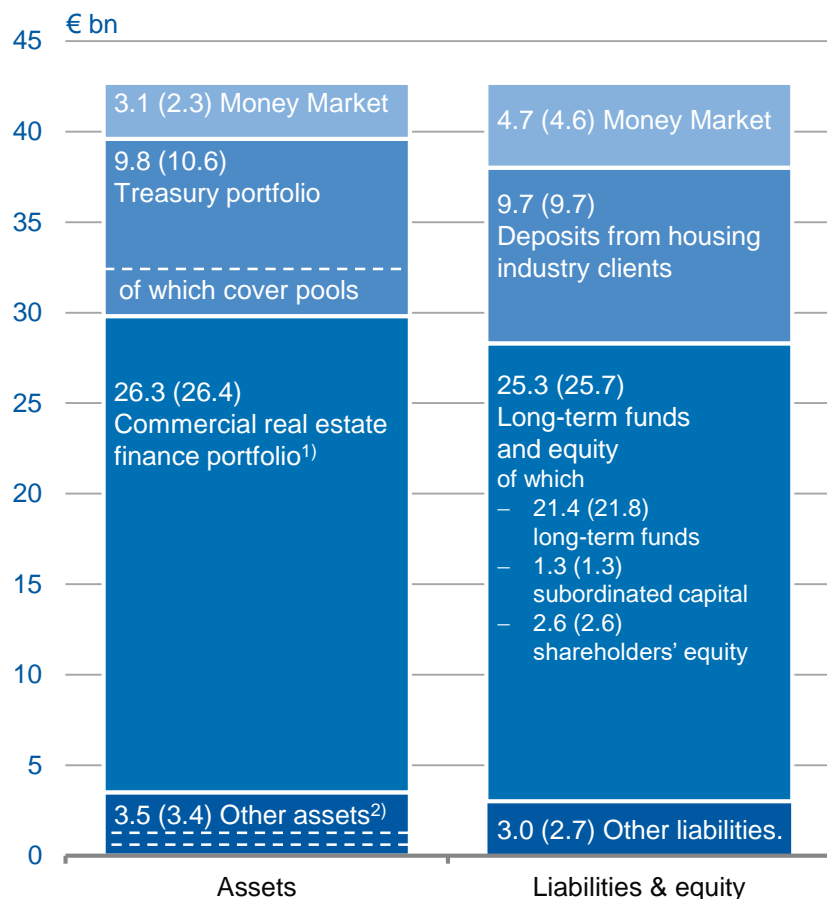

- Sustainable and strong deposit base counts for more than 40% of the well diversified funding mix
- Successful Pfandbrief issuances in Q1:
  - EUR 750 mn Pfandbrief, 5 years
  - EUR 250 mn Pfandbrief Tap, 4 years
- Senior unsecured funding based on well established private placement business:
  - EUR 100 mn Senior Unsecured
- MREL is not a limiting factor due to large amount of outstanding long term senior funding
- NSFR/ LCR well above 100% due to comfortable liquidity position

Strong investor demand for fixed income products result in high issuance activities and decreasing funding spreads for Pfandbriefe and senior unsecured transactions

## Key takeaways

In a challenging environment, Aareal Bank Group started well into the financial year 2019. This shows that our operating business continues to be very robust and our strategy works well.

After a successful start into 2019, Aareal Bank Group confirms its FY targets. We remain confident that we will achieve an operating result on the previous year's level (adjusted for one-off effects).

Aareal Bank Group consistently continues implementing its "Aareal 2020" strategy by focussing on particularly attractive opportunities in the CRE lending business and starting a major digital initiative at its subsidiary Aareon.

# A CRE: Continuing selective new business focus

## Strong transaction volumes losing momentum in 2019 – slowing business cycle

### North America

#### Economy still supportive – CRE cycle plateauing on high level

- Economic growth moderating
- CRE cycle plateauing
- Transaction volumes strong in 2018, expecting decrease in 2019

### Europe

#### Peaking CRE cycle amid economic slowdown

- Economic growth slows down
- CRE cycle start to peak
- Downward trend in transaction volumes after four exceptional years
- Cross-border investment high

### Asia Pacific

#### Economic and CRE slowdown – cross-border investment strong

- Economic growth slows down
- Rental growth stagnating
- Transaction volumes down in 2019
- Cross-border upward trend, especially US

#### Aareal positioning

- Having capabilities to rotate the portfolio composition to geographies and asset classes considered most attractive; managing the new business volumes reflecting regulatory capital and NPL environment.

## B Regulatory capital

What is known today: Future implications on capital anticipated...

Regulation on capital...	...in regulatory figures reflected	...considered in strategic planning
<b>Basel IV (estimated)</b> <ul style="list-style-type: none"> <li>AIRBA</li> <li>CRSA</li> </ul>	✓	✓

<b>IFRS 9</b>	✓	✓

Strong capital position

Strong capital position  
but  
slower (excess) capital growth

## B Regulatory capital

### What may come: future NPL regulatory provisioning

#### Buffersize for regulatory provisioning of future NPL's may vary

- What:** Anticipating impact of ECB guidelines of risk provisioning for future NPL
- How:** 6 years pro rata build-up of buffer for regulatory required prudential provisioning depending on PD/LGD/fc period
- Impact:** Recognition in regulatory capital; slower growth of (excess) capital but already fully reflected in capital planning
- Dimension:** € 200 mn - € 300 mn

#### Modelling theoretical maximum of IFRS 9 Stage 2 sensitivity (CREF business)

- What:** IFRS 9 Stage 2 maximum shift, LLP dimension depending on rating development
- How:**
- 1** : Modelling an (unrealistic) theoretical case of 100% loan volume migrating to stage 2
  - 2** : Additional shift of 1-2 rating classes
- Impact:** Recognition in P/L
- Dimension:** Even in the absolute extreme scenario "only" € 150 – 200 mn additional LLPs would be required, hence all potential macro downturn scenarios digestible by Aareal's strong profit generation capacity
